**IN THE UNITED STATES PATENT AND

In re application of: Dalal et al. **Group:** 2186

Serial No.: 10/724,245 **Examiner:** Tuan Thai

**For: IDENTIFICATION FOR RESERVATION OF REPLACEMENT
STORAGE DEVICES FOR A LOGICAL VOLUME TO SATISFY ITS
INTENT.**

1. This action is responsive to communication filed August 12, 2008. Claim 17 has been canceled. Claims 1-16 and 18-27 are now allowed.

REASONS FOR ALLOWANCE

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record do not teach nor suggest, *either alone or in combination*, **all** the limitations of the amended claims of the current invention (claims 1, 16, 20 and 24). The discussion of the reasons for allowance shall be directed to method claim 1 in which the Examiner shall designate as the primary invention in this application; however, the reasons for

Art Unit: 2186

allowance will also apply to other independent claims 16, 20 and 24 since they contain the same scope of invention as to that of claim 1. The prior arts of record do not teach nor suggest all the combined limitations in each amended claim separately.

Kusters (USPN: 6,681,310) and Jacobsen (USPN: 5,615,352) are the closest prior art references cited by the Examiner. Kusters discloses utilizing global volume manager in a storage management for selectively communicates commands to one or more of the volume providers in order to control the storage devices; it further provides a common application programming interface (API) by which applications are able to control and monitor hardware and software volume providers without requiring detailed knowledge of the volume providers or the underlying storage devices, and aggregates response information from the volume providers and communicates the aggregated information to the software application that issued the storage management request. Jacobsen discloses methods for managing plurality of disks in a RAID system by adding storage disks to a hierarchic disk array while maintaining data availability. Neither Kusters nor Jacobsen disclose identifying a first set of physical storage devices to reserve as backup for a second set of physical storage devices configured to provide the logical volume based upon an intent associated with a logical volume,

Art Unit: 2186

wherein the second set of physical storage devices is configured using the intent associated with the logical volume, and the intent is obtained from a creator of the logical volume when the logical volume is being created and stored on the second set of physical storage devices, and wherein the intent comprises information identifying a set of characteristics specified by the creator of the logical volume, and each physical storage device of the first set of physical storage devices and the second set of physical storage devices conforms to the intent; the same reasons are applicable for other independent claims 16, 20 and 24. In light of the foregoing; claims 1, 16, 20 and 24 of the present application are found to be patentable over the prior arts.

Claims 2-15, 18-19, 21-23 and 25-27 further limit the allowable independent claims 1, 16, 20 and 24. These claims are therefore allowable for the same reason as set forth above.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2186
